DETAILED ACTION

Drawings

New corrected drawings are required in this application because component identifiers listed in the specification do not correspond to the component numberings on the drawings. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings.

Reasons for Allowance

Claims 1-36 are allowed.

This is examiner's statement of reasons for allowance.

The instant invention recites a method for capturing and storing a full Red, Green, Blue (RGB) image data set comprising the steps of:

capturing a full RGB data set as three-color image data with an imager array, said imager array formed on a semiconductor substrate and comprising a plurality of vertical-color-filter detector groups, wherein each of said plurality of vertical-color-filter detector groups is formed on a semiconductor substrate and comprises three detector layers each configured to collect photo-generated carriers of a first polarity, separated by intervening reference layers configured to collect and conduct away photo-generated carriers of opposite polarity, said three detector layer being disposed substantially in vertical alignment with respect to one another and having different spectral sensitivities; and

storing said three-color image data as digital data in a digital storage device without performing interpolation on said three-color image data.

The features identified, in combination with other claim limitations, are neither suggested nor discussed by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
